

Korean Patent No. 125,188

1. Patent Appln. No.: 1995-6526  
Filing Date: March 27, 1995
2. Publication No.: 1997-9245  
Publication Date: June 9, 1997
3. Registration No.: 125,188  
Registration Date: October 2, 1997
4. Expiry Date: (March 27, 2015)
5. Patentee: LG Electro Components Co., Ltd.
6. Current Status: Abandoned on October 3, 2000 due to the non-payment of the fourth(4<sup>th</sup>) annual fee.
7. Title of Invention: ELECTRIC TOOTHBRUSH

8. Claims:

- (1) Claim 1 An electric toothbrush comprising:

- a toothbrush body(10);
- a driving motor(21) disposed within the toothbrush body;
- a bevel gear(22) rotated by the driving motor;
- a first and a second eccentric cams(23, 24) fixed to a rotating axis of the bevel gear(22) to rotate with the bevel gear and having a diameter different from each other;
- a first cam follower(25) vertically movable by the first eccentric cam(23);
- a second cam follower(26) horizontally movable by the second eccentric cam(24);
- an axis connection(27) integrated with the first and the second cam followers(25, 26);
- an axis(28) extending from the axis connection(27), wherein the diameter of the second eccentric cam(24) is greater than that of the first eccentric cam(23) and a horizontal movement amount made by the second cam follower(26) is greater than a vertical movement amount made by the first cam follower(25) to thereby drive the axis(28) in an elliptic manner; and
- a brush head portion(30) inserted into the axis(28) to extend from the toothbrush body and oscillated by the driving mechanism.

- (2) Claims 2 to 8 (not translated into English)
